

Ferma Corporation Utilizes Rapid Recovery for Refrigerant Abatement at Hitachi Global Storage Technologies, Inc.

Concord, California – January 31, 2007 – Rapid Recovery, a Contra Costa County based refrigerant abatement company, has completed a project at the Hitachi Global Storage Technologies, 5600 Cottle Rd, San Jose, California for Ferma Corporation of Mountain View, California.

The refrigerant abatement for this project spanned over several months. It was scheduled around other areas of work, including asbestos abatement, which had already been started in some buildings, to be completed so the buildings could be re-opened for other necessary work. Rapid Recovery made twelve trips to the site over the six month period to complete the work. "It was necessary to walk every building to locate any refrigerated appliances to ensure that nothing was missed and we could certify the site refrigerant free" said Matt Jahn of Rapid Recovery.

The site consisted of six separate buildings which contained over seventy five refrigerated appliances including 800-ton chillers, air dryers, drinking fountains and air conditioning units. Ferma's Project Manager Mark Abutair said "It was a pleasure working with Rapid Recovery". Demolition projects typically have tight deadlines and Rapid Recovery's approach, knowledge and equipment enables them to assist their customers to stay ahead of schedule. Derek Oosterhouse of Rapid Recovery said "Since the units were situated in various locations throughout the jobsite and the access was difficult at times, Ferma needed a company that specialized in refrigerant abatement and came prepared with the necessary specialized equipment and techniques."

Rapid Recovery provides refrigerant recovery and abatement nationwide through its franchise network. Their customer base includes refrigeration and air conditioning contractors, refrigeration wholesale distributors, demolition and environmental contractors, DOD, landfill administrators, and in-house service departments for companies like Raytheon, K-Mart, General Dynamics, and Winn-Dixie. They provide on-site refrigerant recovery, recovery cylinder evacuation, refrigerant disposal and documentation services. Rapid Recovery can be contacted by phone toll free at 877.372.7732, by email at info@raprec.com or via their web-site at www.raprec.com.
