

# Rapid Recovery Offering Credit for R-22

Rapid Recovery, a refrigerant abatement company servicing the continental United States, begins offering credit for R-22.

The only refrigerant abatement company with local offices on both the East and West Coasts is introducing a new program. The program, which began February 25, 2008, rewards contractors with a credit for the R-22 which is recovered. The current credit is substantial at \$1.04 per lb, and will dramatically change the cost associated with recovery. "The times are changing regarding R-22. The cost for certified and packaged R-22 has nearly doubled over the past twelve months. The price increase changes the dynamics for everybody involved in the handling of R-22. While our focus will remain on providing our value added services, we recognize that our customers should be able to benefit from the now valuable R-22 we are recovering for them. We want to ensure that our customers are benefiting from the changing R-22 market" said Les

Rhynard of Rapid Recovery.

While others are offering credit for R-22, there are major differences with Rapid Recovery's program. First, it is concentrated in local markets where Rapid Recovery provides services. This means the customer doesn't have to worry about shipping costs or transferring the refrigerant into other cylinders to be shipped. Rapid Recovery will test the refrigerant on-site prior to the refrigerant ever leaving the jobsite or the cylinder in which it has been stored. Another distinction in Rapid Recovery's program is there will be no reduction in weight or payment due to the reclamation process. Rapid Recovery will be weighing the refrigerant at your shop or jobsite and that is the weight you will receive credit for. "This is very different from industry standard. Some will ask how we can do this. Well it is simple. We are a local service provider, which means we know our customers" said Rhynard.

The new offering by Rapid Recovery boasts no shipping

fees, refrigerant tested at the jobsite and no shrink (weight reduction). This approach is very different from other programs being offered. Rapid Recovery continues to concentrate on providing services for their customers and continues to treat the refrigerant as a by-product of their core business of providing refrigerant recovery and documentation services.

Rapid Recovery offers refrigerant abatement nationwide through its franchise network. Their customer base includes refrigeration and air conditioning contractors, refrigeration wholesale distributors, demolition contractors, DOD, landfill administrators and in-house service departments. They provide on-site refrigerant recovery solutions, including jobsite refrigerant recovery, recovery cylinder service, and refrigerant disposal and documentation services. Rapid Recovery can be contacted by phone toll free at 877.372.7732, by email at [info@raprec.com](mailto:info@raprec.com) or via their web site at [www.raprec.com](http://www.raprec.com). ■
