

Rapid Recovery Provides Service to Quality Refrigeration at Three IBC Locations

Anaheim, CA. November 5, 2007 – Rapid Recovery, a refrigerant recovery company servicing the continental United States, recently completed a refrigerant recovery project at three Interstate Bakery Corporation Facilities for Quality Refrigeration of Wilmington, California.

Jason Weber of Quality Refrigeration phoned Rapid Recovery to request refrigerant abatement at three IBC locations in Southern California. The locations were being shut down and needed to have the refrigerant liability removed prior to vacating the properties. Quality Refrigeration has utilized Rapid Recovery many times, including on the USS Mercy (Naval Medical Ship), prior to this project and once again called on the experienced refrigerant abatement team.

With three separate locations to be recovered, Rapid Recovery arrived at the IBC location in Los Angeles on October 29 and completed the refrigerant abatement from three refrigeration racks as well as six other units with approximately 30 tons in cooling capacity. The other two IBC plant locations to be recovered were located in Glendale and Pomona and were completed on October 30 and November 1 respectively. Between those locations, an additional nine refrigeration racks and twenty-two additional refrigerated appliances ranging from under 10 to 30 tons in cooling capacity were recovered, tagged and properly documented. Each of the IBC locations utilized at least two refrigerant types and well over 3,000 lbs. of refrigerant was recovered. Rapid Recovery kept the refrigerant types separated by identifying the refrigerant types on the unit placards, properly pumping down their recovery equipment and placing the different refrigerants in the appropriate recovery cylinders. Terri LaMere of Rapid Recovery said; “I’m proud of our team and the professionalism, experience and customer service that they bring to each job. It is because of them that contractors like Quality Refrigeration continue to recognize the value added service we provide.”

Rapid Recovery offers refrigerant recovery and abatement nationwide through its franchise network. Their customer base includes refrigeration and air conditioning contractors, refrigeration wholesale distributors, demolition contractors, DOD, landfill administrators and in-house service departments. They provide on-site refrigerant recovery solutions, including job-site refrigerant recovery, recovery cylinder service, and refrigerant disposal and documentation services. Rapid Recovery can be contacted by phone toll free at 877.372.7732, by email at info@raprec.com or via their web site at www.raprec.com.
