

## **Rapid Recovery Chosen for Refrigerant Abatement at Skillman Village**

Phoenix, AZ. April 25, 2007 – Rapid Recovery, a refrigerant abatement company servicing the continental United States, recently completed a project in Skillman, New Jersey for Brandenburg Industrial Services.

Skillman Village is a former North Princeton Development Center situated on over 200 acres of land with approximately 90 buildings. Most of the complex used a chilled water loop for comfort cooling that was needed. The rest of the buildings contained their own comfort air and refrigeration systems. All of the buildings contained small refrigerated appliances such as drinking fountains and window units that needed to be recovered and documented.

Rapid Recovery began work the work on June 13, 2007 and finished at the end of the day on June 14, 2007. The units needing to be recovered were spread throughout the complex and the condition of the work site added time to the job. The overgrown grass and weeds concealed truck damaging debris on the vacant property which meant slow and cautious driving. “Our crew had to be extremely careful of where they drove the vehicle.” said Les Rhynard of Rapid Recovery.

The work at this site was time sensitive due to a summer school schedule that would be taking place at Village Elementary School which is located near the center of the complex. It was imperative that the refrigerant abatement not hold up the project. Rapid Recovery, which is known for their ability to perform refrigerant abatement projects in far less time than traditional contractors by utilizing their specialized and certified recovery equipment and methods, was chosen for the refrigerant abatement. Approximately 100 refrigerated appliances were recovered, tagged and documented per EPA regulations. Adam Dykstra of Rapid Recovery said, “This project went well and we were able to complete it quickly so that our customer could continue with the rest of their work.”

Rapid Recovery offers refrigerant recovery and abatement nationwide through its franchise network. Their customer base includes refrigeration and air conditioning contractors, refrigeration wholesale distributors, demolition contractors, DOD, landfill administrators and in-house service departments. They provide on-site refrigerant recovery solutions, including job-site refrigerant recovery, recovery cylinder service, and refrigerant disposal and documentation services. Rapid Recovery can be contacted by phone toll free at 877.372.7732, by email at [info@raprec.com](mailto:info@raprec.com) or via their web site at [www.raprec.com](http://www.raprec.com).
